Climate Change and Energy Supply: Policy Perspectives from Europe, Asia and Australia

Tuesday 18th November 2014
6pm–7.30pm
Woodward Conference Centre
Level 10, 185 Pelham Street
Carlton, VIC 3053

A comprehensive global solution is required for combating climate change. The growing demand for energy and the need for new ways to produce and use energy are key challenges to face the consequences of climate change. With the EU and Asia comprising a large part of the world’s population from both developed and developing countries, this public forum brings together experts from these socially and politically diverse regions.

This event is presented by the Australian Institute of International Affairs (AIIA) and the Konrad Adenauer Stiftung (KAS) in collaboration with the University of Melbourne EU Centre on Shared Complex Challenges, the Melbourne Sustainable Society Institute and the Australian–German College of Climate & Energy Transitions.

Hear from distinguished speakers from Europe, Asia and Australia about policy alternatives to meet the challenges of climate change and future energy supply:

**Australia**

Prof Tim Flannery  
Professorial Fellow  
Melbourne Sustainable Society Institute

Prof Ross Garnaut  
The Melbourne Institute for Economic and Social Research

**Asia**

Prof Wang Zhan  
Vice Director, Institute of Urban Environment  
Chinese Academy of Sciences, Huabei University  
Wuhan, China

Ms Wan Pratia Wan Han  
Senior Fellow, Technology, Innovation and Sustainability (TiS)  
Institute of Strategic and International Studies (IISS)  
Kuala Lumpur, Malaysia

**Europe**

Mr Charles-Michel Geurts  
Deputy Head of Division, Asia/Pacific – Horizontal Issues  
European External Action Service, Brussels, Belgium

**Moderator**

Ms Cathy Alexander  
Research Fellow  
Melbourne Sustainable Society Institute
